Product Data Sheet
ELKEM MICRO SILICA® 920
Concrete applications

Description
ELKEM MICRO SILICA® 920 is a dry silica fume powder. In use, ELKEM MICRO SILICA® 920 improves the properties and performance of high performance concrete and specialized mortar formulations.

It acts physically to optimise particle packing of the mixture and chemically as a highly reactive pozzolan.

ELKEM MICRO SILICA® 920 is available in two forms: Undensified (U) with a typical bulk density of 200 to 350 kg/m³ and Densified (D) with a typical bulk density of 500 to 700 kg/m³.

Test methods are available on request. For typical analysis of minor elements, please contact our Elkem representative.

Packaging
The product is available in 25 kg bags, various other size bags and bulk road tanker. Please contact our representative for more details.

Storage and handling
ELKEM MICRO SILICA® 920 should be stored in dry conditions and not exposed to moisture.

Health, safety & environment
Refer to Product Safety Information (PSI) document on our website: www.elkem.com

Quality assurance
Elkem Silicon Products management system for development, processing and supply of ELKEM MICRO SILICA® is certified to ISO 9001:2015. The chemical and physical properties of ELKEM MICRO SILICA® 920 are regularly tested.

Sustainability
For Elkem, sustainability is central to our business strategy. Our mission is to provide advanced material solutions shaping a better and more sustainable future, adding value to our stakeholders globally. We are committed to reducing embodied carbon emissions. For further information, please visit www.elkem.com/sustainability/ or contact us to learn more about our sustainability roadmap.
