ELKEM MICRO SILICA® 940 is a dry silica fume powder. It is a key ingredient in many construction materials. In use, it acts physically as a filler and chemically as a highly reactive pozzolan.

ELKEM MICRO SILICA® 940 is used in gypsum board applications to improve fire performance. It delays board shrinkage and retains board core strength under fire conditions, which improves the overall durability properties of the boards.

ELKEM MICRO SILICA® 940 is available in two forms: Undensified (U) and Densified (D).

*Test methods available on request. Typical values for guidance only.

*Tested on undensified

### Packaging

The product is available in 25 kg bags, various other size bags and bulk road tanker. Please contact our representative for more details.

### Storage and handling

ELKEM MICRO SILICA® 940 should be kept in dry storage. Products that have been subjected to moisture and allowed to dry again may result in inferior performance.

### Health, safety & environment

Refer to Product Safety Information (PSI) document on our website: [www.elkem.com](http://www.elkem.com)

### Quality assurance

Elkem Silicon Products management system for development, processing and supply of ELKEM MICRO SILICA® is certified to ISO 9001:2015. The chemical and physical properties of ELKEM MICRO SILICA® 940 are regularly tested.

### Sustainability

For Elkem, sustainability is central to our business strategy. Our mission is to provide advanced material solutions shaping a better and more sustainable future, adding value to our stakeholders globally. We are committed to reducing embodied carbon emissions. For further information, please visit [www.elkem.com/sustainability/](http://www.elkem.com/sustainability/) or contact us to learn more about our sustainability roadmap.
