

## PRODUCT STEWARDSHIP POLICY

Elkem defines Product Stewardship as an integrated business process for identifying, managing, and minimising the health, safety, environmental and regulatory risks through all the stages of a product's life in the best interest of society.

As such Elkem is committed to the following principles:

- **COMPLIANCE:** comply with all applicable chemical regulatory requirements in the countries where we either manufacture and/or sell chemicals.
- **PROACTIVE:** perform regulatory compliance reviews for all New Product Development as well as all product launches.
- **LIFE CYCLE MANAGEMENT:** assess regulatory compliance, human health, safety as well as environmental protection aspects from raw materials sourcing through production, use and disposal.
- **REACT/MONITOR:** proactively identify and manage chemical risks and concerns throughout our operations.
- **REDUCTION or SUBSTITUTION:** To replace or reduce raw materials and products in the portfolio that would pose an unacceptable risk to human health, safety or environment within a reasonable amount of time
- **COMMUNICATION:** To share information with our stakeholders about the health and safety aspects of products and to ensure that our customers can safely use our products.
